caCORE SDK Workbench 0.2 Release Notes

caCORE SDK Workbench 0.2 Release Notes

Product Changes

New Features

Items marked **New Feature:** can be found in the GForge project Feature Requests tracker group.

- **New Feature:** [#29549] Allow Web Interface, RESTful APIs to be enabled and disabled independently of support for ISO Data Types

Bug Fixes

- None.

Important Remaining Issues

- If the Grid Security is enabled, the following Warning message is displayed on the JBoss console:

    16:55:14,126 WARN [Init] Exception while installing Function

    ```
    java.lang.NoSuchMethodException: org.apache.xpath.compiler.FunctionTable.installFunction(
    java.lang.String, org.apache.xpath.Expression)
    at java.lang.Class.getMethod(Class.java:1581)
    at org.apache.xml.security.Init.registerHereFunction(Unknown Source)
    ```

    This warning can be ignored. *[#23336] Progress Text is not Displayed While SDK Instance is Installed. A blank progress text message is displayed while an SDK instance is installed. The operation of installing the SDK, however, should complete successfully.*

- [#30268] SDK Support for ISO Data Types does not work with Postgres v8.3+.

CORE Product Dependencies

The caCORE Workbench v0.2 is dependent upon caCORE SDK v4.4.
